For Shipment as Bulbs Arrive
during Summer and Fall?

Orders placed with us early enable us to estimate our requirements more closely, and by including your order with ours, for importation, we can afford to sell you at lower rates than in the Autumn, for the reason that when importing on a certainty, we take less risk in having a surplus left. Should we be able to offer anything at a lower rate later in the season we will give you the benefit.

Thus you have everything to gain and nothing to lose by ordering NOW.

We are the Largest Importers, Dealers and Growers of Bulbs in America, and handling the unusually large quantities that we do, and being experienced Forcers and Growers ourselves, we are in consequence enabled to select superior stock at advantageous prices, allowing us to offer Superior Bulbs at reasonable rates.

HENDERSON'S SUPERIOR

Early "Roman" Hyacinths.

THE flowers, while smaller than those of the Dutch Hyacinth, yet are produced in much greater abundance—each bulb bearing several very graceful flower spikes. The delicious perfume, earliness and profusion of bloom have made Roman Hyacinths exceedingly popular; they are so easily grown and so early that if potted in August and September they can be brought into flower in November and December, and a succession can be had in bloom throughout the winter. Roman Hyacinths are not considered hardy enough for open-ground culture north of Washington, though in our grounds near New York they have proven perfectly hardy, slightly protected. For cutting purposes the Roman Hyacinth is the finest bulb grown. (See cut.)

What Florists Think of *

Henderson's Superior Roman Hyacinths.

"I ordered Roman Hyacinths of you in the fall and must say I never saw finer bulbs. Some of them had as many as fifteen, and a few had seventeen spikes of flowers." J. O. CRABB, Cedartown, Ga.

"Your Roman Hyacinths turned out very satisfactory, as always. Send us prices for this season's bulbs and we will send you our order." GRALLERT & CO, Colma, Cal.

"The Roman Hyacinths you sent me last fall forced grand." C. N. JOHNSON, Louisville, Ky.

"Dutch Roman" or Pan Hyacinths.

There are some varieties of Dutch Hyacinths that throw good flowers from bulbs no larger than those of French Romans. These are known in the trade as "Dutch Romans," and they are becoming more popular every year with florists for forcing for cut flowers and for growing in pans for sale. The bulbs may be planted quite close together. The early sorts may be flowered but little later than French Romans and a continuous supply may be kept up from January to May. The flowers are finer than those of French Romans, the spikes and bells being larger and of better substance lasting longer either on the plant or when cut.

All varieties of Dutch Hyacinths do not flower equally well from small bulbs, so our grower has made a selection of some of the best which we offer below; size of bulbs 13 to 15 centimeters.

HENDERSON'S SUPERIOR NAMED DUTCH HYACINTHS.

In this grade we offer the largest and best bulbs that the varieties produce. Some kinds, of course, make larger bulbs than others, but purchasers may rely on getting the pick of the crop. These selected "top roots" as the Hollanders call them, naturally cost a little more than the run of crop, but are worth the difference where largest spikes furnished with the greatest number of bells are desired for pots, glasses and exhibition, for the flowers of Hyacinths in an incipient form are stored in the hearts of the bulbs before maturity, exactly as they afterwards develop, so that if you purchase younger, cheaper bulbs, containing in embryo fewer bells on a spike, no system of culture can make them produce more that season. Therefore, for the finest results the best, oldest and largest bulbs (within certain limits) should be chosen, for these usually contain the most perfect and greatest number of flowers.

The figures 1, 2, 3 and 4 after the name of the Hyacinth indicates the relative time of flowering—the 1's flower together and are the earliest, No. 4 the latest.

Late Flowering Garden Tulips.

LATE FLOWERING GARDEN TULIPS are now on the rising tide of popularity.

These do not supplant early Tulips for design bedding, but for mixed gardens, herbaceous borders, sunny positions in proximity to shrubbery, etc.—where these late or May-flowering Tulips need not be disturbed, they will prove a source of great satisfaction, being very hardy, continuing to grow, increase and flower for years.

NARCISSUS, PAPER WHITE

"*Grandiflora*," or Large Flowering.

This large flowering type is such an improvement over the ordinary "Paper White" that we have discontinued offering the latter. The "Large Flowering" is more vigorous and earlier, producing purest snow white flowers of large size and good substance in large trusses. The Paper White Narcissus is becoming very popular for growing in bowls of water like the Chinese Narcissus. In fact the Paper White gives so much better satisfaction than the Chinese Lily that it is supplanting the latter for water culture.

Price of extra sized bulbs, 25c. per doz.; \$1.00 per 100; \$9.00 per 1,000.

Henderson's Giant Christmas Forcing LILY OF THE VALLEY.

The finest grade of Lily of the Valley in the world for early winter flowering. They will bear twelve to sixteen large bells on strong stalks with foliage even when forced for extra early; they are equally superior for later or successional crops. The pips average large, plump and regular, with extra long roots. Read what our customers think of them.

"The Christmas Valley I had from you were very fine—better than any I have handled in 18 years' experience, and I have kicked myself because I did not order more. Will want a large quantity next season; can't compete nowadays unless you have something a little better than the other fellow—and the extra price received more than pays the difference in cost between No. 1 stock and ordinary, and there is a satisfaction outside of dollars and cents that goes a long way." S. A. E. LYMAN, Essex Greenhouses, Coe Ridge, O.

Henderson's Superior
BERMUDA EASTER LILY
(LILUM HARRISII.)

The TRUE Bermuda Easter Lily is our Great Specialty. We were the pioneer introducers of it and have always been "Headquarters," supplying the trade generally, both in Europe and America.

We wish to lay particular stress upon the size and quality of our Bulbs which are larger, healthier and better than those usually sold—for the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year.

WHAT FLORISTS THINK OF
HENDERSON'S EASTER LILY BULBS

"We have been more successful with your Harrisii bulbs than have any of the other florists in the vicinity of Wheeling with bulbs from other sources."

OSCAR WRIGHT, Moundsville, W. Va.

"I got 100 Harrisii Lily Bulbs from you last year and 99 of them bloomed all right, they were a nice lot."

WILLIS E. HAMILTON, Florist,
Belfast, Maine.

"You may book my order for 7 to 9 inch Lilium Harrisii. Those from you this year were fine."

E. HAENTZE, Florist,
Fond du Lac, Wis.

"I am well pleased with the Harrisii Lilies I got from you; they are the best I have had in 10 years."

H. A. MAXINER, Port Jervis, N. Y.

"FORMOSA" LONGIFLORUM LILIES.

FOR EARLY FORCING.

This type of Lilium longiflorum from the Island of Formosa has been grown experimentally by a few florists in the U. S. the past two seasons and in most instances has proven the claim that it can safely be forced earlier than any other longiflorum type (excepting L. Harrisii). The plants were of healthy strong growth, producing freely, large pure white flowers of splendid lasting substance.

We understand that some stocks of alleged Formosa "Lilies" put out last season were not quite satisfactory, being mixtures of various longiflorum types, but no word of complaint has been received regarding our strain. In fact we have received several commendatory letters with accompanying orders for "Henderson's Strain of Formosa Longiflorums." Our bulbs are coming from the same grower this season as in the past.

...LILIU M CANDIDUM...

(Ready in August.)

Our Lilium Candidum are the thick, broad-petaled type so superior to the narrow-petaled south of France stock. The bulbs are plump, heavy and healthy.

This popular, fragrant, snow-white, hardy garden Lily is also known as "Annunciation Lily," and "Madonna Lily." It grows 3 to 4 feet high, and blooms in the open ground in June. When grown in bold masses or in rows these lilies are especially effective, the brilliancy of their snow-white flowers against surrounding greenery of shrubs, grass and trees is very telling. This lily dislikes being coddled, thriving best when it can remain undisturbed for years in good garden soil.

Price, 8 to 9 inch bulbs, 60c. doz.; \$4.00 per 100; \$35.00 per 1000.

HENDERSON'S SUPERIOR

JAPAN EASTER LILY BULBS

(*LILIU M LONGIFLORUM.*)

For shipment last of September or early in October to December.

The imported Japan grown bulbs of *Lilium Longiflorum* as they arrived in this country up to two or three years ago—were usually a mixture of various types, including early flowering, later flowering, tall, dwarf, narrow leaved, broad leaved, green stemmed, red stemmed, black stemmed, small flowered, large flowered, etc. Agreeable to our persistent solicitation, our growers commenced to separate the desirable types, and discarded those unsuitable for Florists' use. So that we are now able to offer only the best forcing strains of Japan grown longiflorum which our growers say will come 90% true though we cannot guarantee it. Of course, on account of the later arrival of the bulbs they cannot be forced into flower as early as the Bermuda type *Lilium Harrisii*, but for late winter and spring flowering the Japan grown bulbs are very popular on account of their low price. Some florists think the flowers from the Japanese bulbs are superior in size and substance to those of *Lilium Harrisii*, but we think the cool, slower forcing of the Japanese bulbs accounts for this.

In ordering, be careful to state which strain of *Lilium longiflorum* is wanted. In absence of such information *L. Longiflorum Multiflorum* will be sent.

Longiflorum Multiflorum. This type blooms very early in Japan.

The stem is tall, leaves narrow and the plant a little more slender than the common type. It is the favorite type for forcing.

Longiflorum Giganteum. This type blooms in Japan about two weeks later than *L. Multiflorum*, but the flowers are of larger size, perfect in form and of superior substance; stems marked black.
